Object-Oriented Programming,
Basic Data Structures,
Database Fundamentals,
Problem Solving

Design Skills

UI/UX Design
Wireframing & Prototyping
Responsive Layout Design
User-Centered Design Principles

Soft Skills

Fast Learner
Problem Solving
Adaptability
Team Collaboration

About

I focus on designing UI/UX solutions that make digital products intuitive and effortless for users. My goal is to create interfaces where functionality meets clarity, ensuring smooth and seamless user journeys. I enjoy refining interactions so every user experience feels natural and efficient.

Tools

Figma | Framer | Rive | VS Code | GitHub | Notion | Jira | Maze | Cursor |

Projects

1. Passu – Waitlist Landing Page

Built a full frontend landing page with integrated PHP backend for waitlist management.
Focused on responsive design, smooth user interactions, and functional workflows.
View Website

2. SmartClass Connect – School Telegram Bot

Developed a Python-based Telegram bot for KG & Primary schools in Ethiopia.
Features: free learning materials, mentorship, announcements, registration verification, and tuition tracking via Google Sheets.
GitHub Repository | Telegram Bot (currently out of service)

3. Local Business Directory Database

Created a structured database for local businesses with SQL, enabling efficient storage and retrieval of business information.
